

Stacking Unit Upgrades and Accessories

Multi-Shifter, Inc. is proud to share with you some new upgrades and accessories now available for your stacking vehicle!

Upgrades

New Switches: You may now upgrade all of your current control panel rocker switches with our new rotary switches. These new switches are two and three position switches that are heavier duty than the current rocker switches. The price to upgrade these switches is approximately \$50 - \$75 per switch and includes wiring schematics.

Accessories

Laser Alignment: Always know where to line up on your battery racks with these new laser alignment units. Two different units available – horizontal and vertical alignment. The horizontal alignment unit allows you to quickly pinpoint when the vehicle bed is at the correct roller height. The vertical alignment unit allows you to quickly pinpoint when the magnet arm is centered with the battery being pulled. Each unit activates automatically when the vehicle is energized. The price for each unit is \$150.00 each.

PolyCarbonate Drain Pans: Add drain pans to your existing battery rack and protect the tops of your batteries and your floors with Multi-Shifter's full line of high-density polycarbonate drain pans. We offer a **FULL 5-YEAR WARRANTY** on these pans. Contact the factory for specifications and pricing.

Backup Alarms, Lights, etc.: Multi-Shifter can also supply you with backup alarm kits, lights, horns, and mirrors for your Multi-Shifter vehicle. These accessories are great for extra safety measures. Contact the factory for details on the any items that may be of interest to you.

Recommended Spare Parts

AC Trolley Replacement Brushes: Multi-Shifter, Inc. recommends that all users of our AC powered equipment keep a set of replacement brushes in stock for the trolley. Brushes in the AC trolley wear down over time and should be checked often for excessive wear. Replace them when wear exceeds the mark on the brushes. If your brushes should wear completely, your system will not receive power and will not operate. Contact the factory with any questions, or for full instructions on how to check and/or replace your brushes.

As always, if you have any questions, concerns, or to place an order, please contact Michael Del Vecchio or Mike Keeter of the Aftermarket Department at Multi-Shifter, Inc. Our toll free number is 1-800-457-4472.
